### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 11, 13, 19-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Larsen et al (US Patent 5993459). Larsen et al disclose an insertion tool 200 in Figures 7 and 18. For claims 11 and 19-21, the first component (230 or 210) is coupled to palm engagement portion 240 and engages anchor 10 (column 5, line 17). The first component (230 or 210) is also axially moveable with respect to second component (210 or 230) (column 5, lines 1-2). The second component (210 or 230) is coupled to finger engagement portion 220 and tensioner (160 or 231). The finger engagement portion 220 is configured to axially slide relative to the handle 240 (column 5, lines 23-25). For claims 13 and 19, the first component (230 or 210) is engaged to the anchor 10 and is therefore capable of rotating together.

### ***Response to Arguments***

Applicant's arguments filed 06/05/06 have been fully considered but they are not persuasive.

Regarding the Applicant's arguments filed on June 05, 2006, the Examiner clearly understand the Applicant's response. However, independent claim 11 is broad enough to read on the inner shaft extending distally in relation to the outer tube. As mentioned above the second component (230) is axially movable with respect to the first component (210). The finger

portion (220) is coupled to the second component (230) and the finger portion is movable relative to the palm portion.

Regarding line 14, page 7 of the Applicant's argument, element structure 230 moves distally relative to element 210, see Fig. 31.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
